

# INTRODUCING LONSEAL'S SRG FLOORING PRODUCTS

High Performance, semi-rigid flooring that exceeds demands of healthcare environments.

LONWOOD SRG is a dimensionally stable, wear resistant heterogeneous resilient sheet vinyl flooring solution featuring an exclusive GreenAir(TM) technology that significantly reduces VOC emissions. Combined with natural wood grain appearance and great performance, Lonwood SRG is formulated not to crack, expand, contract or curl under movement of heavy equipment and loads.

Designed specifically for use under heavy duty equipment areas like MRI, LDRP, or labs that require ease of maintenance, chic colorways and durability under high traffic.

## FEATURES AND BENEFITS:

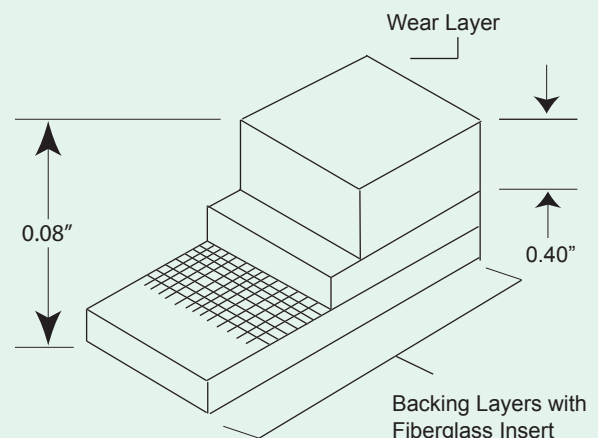

Semi-rigid wear layer and fiberglass interlayer is formulated to provide maximum resistance to vertical heavy load application and lateral dynamic moving force.

Formulated not to expand, contract, crack or curl under heavy rolling loads and high traffic areas.

Available in warm wood grains and smooth patterns in chic colorways. All Lonseal products can be manufactured using "SRG" Heavy Load giving you over 150 options.\*

Manufactured with GreenAir low VOC and anti-microbial materials.

Features smooth surface that aids in the elimination of bacterial buildup'

\*subject to minimum quantity of 500 sq yds.
