

The Amazing Benefits of Bamboo Flooring

Attractive Prices On Premium Widths and Lengths on all of our bamboo & eucalyptus floors, and the world's largest selection of bamboo moldings. Special delivery rates.

Best floors for pets, kids and kitchens.

Strand woven bamboo is by far the hardest wood flooring on earth, which makes it great for active families, and rarely if ever needs refinishing in a residential setting.

Stylish And Unique.

Strand woven bamboo floors have a distinctive and unique marbled grain that is warm, inviting, and different than common hardwoods, yet still warm underfoot, and 100% natural.

Environmentally Friendly.

Bamboo & eucalyptus are rapidly-renewable resources that are harvested every 5 years from well-managed farms, compared to 40-80 year growth cycles for traditional hardwoods.

Easy To Clean And Maintain.

Bamboo hardwoods are easy to clean and don't trap allergens, dust and dirt. Our floors also provide at least 20 hour spill protection, which make them great for kitchens.

Safe For Your Customers.

All Blue Forest® floors meet the most strict indoor air standards in the world such as CARB Phase 2 and Super Eo.

Variety Of Installation Options.

We offer click-lock floating floors, engineered floors and solid tongue and groove floors, to name a few. Our floors can be installed over concrete, in basements and more.

Can Be Refinished.

All of our floors can be refinished at least twice, but the huge advantage to strand bamboo is that, due to its extreme hardness, it rarely if ever needs refinishing in a residential setting.
